English level: Intermediate;

Education

2014 – until today	**Odessa I.I. Mechnikov National University** Applied mathematics
2009 – 2014	**Richelieu Lyceum**

Work Experience and additional information

Don't have work experience in IT. Had some educational projects:

WPF project with SQLite database. It's a program for easy creating power of attorneys. Program use autocomplete fields, all data for autocomplete load from database. After create power of attorney in app program can generate Word file and print it if you want. Also program has simple interface to manage all your documents.

Website with ASP .NET MVC 5 and MS SQL database. It is site for engendering company which want to present its production and give basic information about contacts. Site give an opportunity to dynamically add production and create simple page for it using smart html editor which is convenient for regular user. For UI design site use Bootstrap.

Although I've had very small experience with ASP .NET Core + WEB API + Angular. These technologies are very interesting for me and I want to continue work with it and master my knowledge in this direction.
